Archilles

AI-powered risk detection for architectural design

Problem

Architects spend hours manually reviewing building plans.

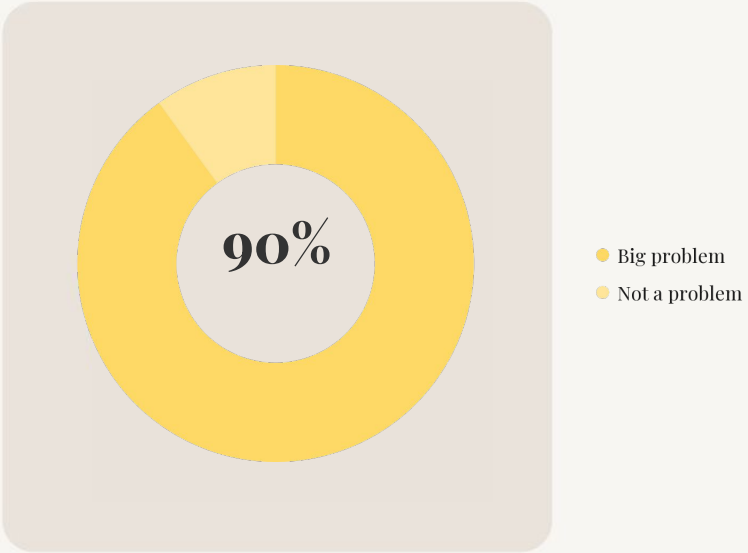

- Manually cross-checking blueprints against building regulations.
- Regulations vary depending on the building's intended use.
- Errors in blueprints lead to delays and fines.

Our research

9/10

respondents identified blueprint compliance review as a major problem.

n = 10 respondents

Three pillars of Archilles analysis

Geometry Agent

Detects structural elements on architectural plans using Claude Vision.

Regulation Agent

Identifies applicable building regulations based on project details and detected elements.

Review Agent

Highlights compliance issues, explains findings, and suggests corrective actions.

Three Agents. One Shared Intelligence.

Mozaik connects specialized agents through a shared project state.

From 2D blueprint to error finding

01

Upload Blueprint

Import a 2D architectural floor plan.

→

02

Geometry Analysis

AI identifies rooms, doors, and dimensions.

→

03

Regulation Check

Agents select the building rules that apply.

→

04

Risk Detection

Find issues and get actionable feedback.

Every finding comes with proof.

A verifiable connection from the design finding to the official legal text.

01

Official source

Direct link to the Legal Information System of the Republic of Serbia.

02

Exact citation

Official Gazette issue, article, paragraph and point.

No unsupported legal citations. Every claim traces back to its source.

Business model

Architects use it. Firms pay for it.

B2B software designed for architecture and engineering teams.

01 USERS

Architects & design teams

USE ARCHILLES

Review blueprints, flag potential issues and inspect findings.

02 CUSTOMERS

Architecture & engineering firms

PAY FOR TEAM ACCESS

Equip project teams with consistent design reviews.

Architects already invest in software.

A growing industry. A focused opportunity in regulatory compliance.

2026 GLOBAL AEC SOFTWARE MARKET

$14.2B

Broad AEC software market

$39.1B projected by 2033

15.5% projected CAGR · 2026–2033

PUBLISHED U.S. SOFTWARE PRICES

Annual subscriptions

Archicad Max	Graphisoft	$5,700
AEC Collection	Autodesk	$3,675
Revit	Autodesk	$3,005
AutoCAD	Autodesk	$2,095

Starting with the architects we know.

01

Existing connections

NOW

We know architects within our network.

02

Direct conversations

NOW

We are already in contact with them.

03

Early pilot outreach

NEXT

Invite interested firms to test Archilles.

Start local. Scale globally.

A repeatable expansion model, built around country-specific building regulations.

01

Validate in Serbia

Build trust through local architects and pilot reviews.

02

Adapt regulations

Add expert-reviewed rule packs for each new market.

03

Expand internationally

Grow through design firms and BIM integrations.

The Archilles advantage.
